Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

For claims 1-35, the prior art of record fails to teach a first and second array of nozzles and valve pins, a manifold, a first and second actuating assembly for displacing the valve pins of the respective array of nozzles comprising at least one actuator and a common linkage element driven by the actuator and linked to all the valve pins of the respective array of nozzles, and further having the first and second actuating mechanisms operable independently. The closest prior art, McGrevy, has a common actuator that drives both actuating mechanisms, thus the mechanisms could not operate independently.

For claims 38-40, the prior art of record fails to teach actuators located between or centrally located in the injection nozzle, the actuator located under the manifold. The term "under" is in relation to the actuator being between the manifold and the tip of the nozzle. The orientation of the array of injection nozzles is with the manifold on top of the nozzles. Gellert and Diaz fails to teach an actuator located in between the injection nozzles for actuating the linking element, instead the actuator is located either to the side or if located centrally within the nozzles, the actuator would be positioned "above" the nozzles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
